Who would win in an all-out brawl: Batman or Superman?

Batman vs. Superman is one of geek culture's greatest debates. We have seen both characters as a derring-do team. But we have also seen them as adversaries with divergent takes on superhero politics. On one hand, Superman is the Man of the Steel and could easily take down a mere mortal... or so it seems. But the Dark Knight should never be underestimated; he has the knowledge, wits, and determination to take down any hero—if need be. **Who do you think would win in a fight?** 🦇

Batman is honestly scarier than Superman. The Dark Knight is the world's greatest detective, a warrior at peak human strength, a genius, a billionaire, and he isn't afraid to get his hands dirty to take down bad guys.

Batman stays packing with gadgets, but his greatest weapon in a fight against Superman is Kryptonite. With enough Kryptonite and other gadgets, Batman would easily win.

#TeamSuperman

Superman is a basically a god from another planet. Batman might be cool, rich, and a master fighter—but he's only a man. There's not enough body armor in the world to stop Superman from annihilating Batman with his heat vision, superhuman strength, or flight. Luckily enough for Batman, Superman would never do that. He pulls his punches, which is saying a lot, because there aren't many foes on his level.
